COLLECTED WITH CARE. RECYCLED WITH PURPOSE.

Road and depot steel, whitegoods, X-ray and medical equipment, furniture, racking, plant and offcuts, from councils, homes, business, institutions and industry. If it's mostly metal, we collect it, do the lifting, recycle it and report every tonne. One service fee for the job, quoted before we come.

QUOTE

FIRST

Nothing is booked until you approve it.

PAPERWORK

INCLUDED

A docket and a statement for every load.

SERVICE FEE

QUOTED UPFRONT

Crew time, lifting, dismantling, specialist handling and paperwork, approved before we come.

WHAT WE COLLECT

766 ITEMS · 15 CATEGORIES

01 **COUNCILS** Signs, bins, playgrounds, depot steel	02 **TRANSFER STATIONS** Whitegoods, bikes, batteries, gas bottles	03 **RESIDENTIAL** Garage and shed steel, trampolines, hot water	04 **STATE ROADS** Guardrail, sign posts, light poles, culverts	05 **HEALTH & AGED CARE** X-ray units, beds, hoists, wheelchairs
06 **EDUCATION** Lockers, lab benches, desks, machinery	07 **OFFICES** Fit-outs, filing cabinets, server racks, compactus	08 **WHITEGOODS & RETAIL** Fridges, washers, returns, shelving	09 **WAREHOUSING** Pallet racking, cages, stillages, forklifts	10 **INDUSTRY** Machinery, motors, tanks, offcuts
11 **TRADES** Cable, copper pipe, switchboards	12 **RURAL & FARMING** Machinery, silos, troughs, fencing, tanks	13 **HOSPITALITY** Kitchens, stainless, coolrooms, kegs	14 **SOLAR** Panels, frames, inverters, batteries	15 **AIRPORTS & PORTS** Containers, trolleys, cranes, chain

Mostly metal, please. Items that are mostly steel, stainless, copper, aluminium or brass, working or not. Mixed items are quoted case by case. The fee depends on what it is, the work on site, access, timing and how much. Search all 766 items at rdodeployme.github.io/global-steel/what-we-collect.html

BOOK. QUOTE. COLLECT. RECYCLE. REPORT.

01	02	03	04	05
BOOK	**QUOTE**	**COLLECT**	**RECYCLE**	**REPORT**
What, how much, where and when. Photos help.	What we can take and the service fee. A site visit for big jobs.	We do the lifting and follow your site rules.	Weighed at our plant and processed back into production.	Weight, what it became and the CO_2-e avoided.

DATA-BEARING EQUIPMENT

- ✓ We do not take data-bearing drives.
- ✓ Your team removes or wipes drives and SSDs before collection, under your own policy.
- ✓ You sign a short data declaration when you book. It is kept with your collection record.
- ✓ Our crews will not load loose drives.

WHAT YOU GET BACK

- ✓ A weighbridge docket for every load.
- ✓ A collection statement: items, weights, what each became and the CO_2-e avoided.
- ✓ Period statements across all your sites in Metal Recycling Connect.
- ✓ Environmental reporting through YARTA Environmental Sustainability, a Recycle Group initiative.

RETIRED MEDICAL EQUIPMENT

We collect once your biomedical engineering team, or the supplier, has decommissioned and cleared it:

- ✓ Decontaminated, with a certificate or tag.
- ✓ Data removed or wiped by your team; data declaration signed.
- ✓ X-ray units rendered inoperable and disposal notified to the Department of Health, as your management licence requires.
- ✓ Tube and transformer oil tested for PCBs; lead-lined housings and beryllium-window tubes assessed under the department's guidance.
- ✓ Clearance form signed by the licence holder.

GAS AND PRESSURE

Gas bottles, welding cylinders, fire extinguishers, aerosols and nitrous oxide canisters are Specialist items. Empty or discharged, and yours: hired cylinders go back to the supplier. Acetylene by arrangement.

WHAT WE CAN'T TAKE

- × Asbestos, or anything that may contain it
- × Clinical and biological waste, sharps
- × Hired, full or leaking gas cylinders
- × MRI magnets, except by arrangement
- × Radioactive material and sources
- × Chemicals, solvents and oils
- × Fridges, freezers and air-con not yet degassed
- × Explosives, ammunition and general waste

BOOK A COLLECTION

Tell us what you have, where it is and when suits. We confirm what we can take and quote the service fee before we come.
