THE METAL RECYCLING COMPANY

COLLECTION SERVICE · OCTOBER 2026

FREE METAL COLLECTION FOR HOSPITALS, UNIVERSITIES AND ORGANISATIONS

Old bed frames, filing cabinets, lockers, racking and steel furniture — collected free as metal-only loads. Laptops, medical and lab equipment and dismantling are quoted before we come. We do the lifting; every load is weighed, recycled and reported.

BOOKING

FREE

Tell us what you have, where it is and when suits.

METAL-ONLY LOADS

FREE COLLECTION

Frames, cabinets, lockers, racking, stainless, cable and scrap, over our minimum load.

SPECIALIST ITEMS

QUOTED UPFRONT

IT and e-waste, medical and lab equipment, dismantling, small loads, difficult access.

HOSPITALS & HEALTH (RENDERED)

UNIVERSITIES & EDUCATION (RENDERED)

BUSINESS & GOVERNMENT (RENDERED)

HEALTH & AGED CARE

- Hospital and aged-care bed frames
- Trolleys, carts, linen cages
- Wheelchairs, lifters, IV poles
- Stainless benches and sinks
- Sterilisers, decommissioned
- Medical and imaging equipment, once cleared

EDUCATION & RESEARCH

- Lab benches and frames
- Decontaminated lab equipment
- Workshop machinery and tooling
- Laptops, desktops, servers, racks
- Lockers, shelving, compactus
- Steel furniture and seating frames

BUSINESS & GOVERNMENT

- Filing cabinets, compactus, safes
- Desk and partition frames
- Pallet racking, cages, stillages
- Commercial kitchen stainless
- Cable, switchboards, motors, plant
- Gym, seating and venue equipment

What is free. Metal-only loads — equipment that is all or almost all steel, stainless, copper, aluminium or brass, working or not — over our minimum load, confirmed when you book. Laptops, servers, screens, medical and lab equipment, mixed furniture and anything needing dismantling are quoted.

BOOK. CONFIRM. COLLECT. RECYCLE. REPORT.

what, how much, where and when — photos help	what is free, and a quote for anything that is not	we do the lifting and follow your site rules	weighed at North Geelong, processed back into production	weight, what it became, CO_2-e avoided — per collection

DATA-BEARING EQUIPMENT

- ✓ We do not take data-bearing drives.
- ✓ Your team removes or wipes drives and SSDs before collection, under your own policy.
- ✓ You sign a short data declaration when you book; it is kept with your collection record.
- ✓ Our crews will not load loose drives.

WHAT YOU GET BACK

- ✓ A weighbridge docket for every load.
- ✓ A collection statement: items, weights, what each became, CO_2-e avoided.
- ✓ Period statements across all your sites in Metal Recycling Connect.

RETIRED MEDICAL EQUIPMENT

We collect once your biomedical engineering team — or the supplier — has decommissioned and cleared it:

- ✓ Decontaminated, with a certificate or tag.
- ✓ Data removed or wiped by your team; data declaration signed.
- ✓ X-ray units rendered inoperable and disposal notified to the Department of Health, as your management licence requires.
- ✓ Tube and transformer oil tested for PCBs; lead-lined housings and beryllium-window tubes assessed under the department's guidance.
- ✓ Our clearance form signed by the licence holder.

No radioactive sources. MRI magnets only after specialist decommissioning.

WHAT WE CAN'T TAKE

- × Asbestos, or anything that may contain it
- × Clinical and biological waste, sharps
- × Gas cylinders — return to your supplier
- × Loose lithium batteries — removed and kept apart
- × Radioactive material and sources
- × Chemicals, solvents and oils
- × Fridges, freezers, air-con not yet degassed
- × General waste and non-metal furniture
